EXPERIENCE

miniOrange, Pune

Sr. Product Designer

July 2022 - Present

- Improved usability by 85% within 6 months for a revenue-critical Privileged Access Management (PAM) product by redesigning complex admin workflows and access configurations; reduced cognitive load while preserving enterprise-grade security constraints.
- Drove UX strategy across 10+ enterprise IAM and access management products by aligning feature design with security, scalability, and business priorities; enabled consistent decision-making across multi-team product roadmaps.
- Influenced product and engineering roadmaps by conducting UX audits and heuristic evaluations across platforms; uncovered high-impact usability gaps and informed prioritization for platform-wide improvements.
- Increased website conversion by 20% and reduced bounce rate by 35% by co-creating a scalable design system supporting 5000+ pages; standardized components and patterns to accelerate development and reduce UX inconsistencies.
- Designed and optimized complex admin interfaces, including a Payment Portal used by 20k+ users, by translating security-heavy workflows into intuitive, error-resistant user experiences for enterprise administrators.
- Enabled faster cross-functional alignment by acting as a strategic design partner to PMs, engineers, and architects; facilitated design reviews that balanced user needs, technical feasibility, and regulatory constraints.
- Strengthened team capability by mentoring 5+ junior designers, improving design quality, review rigor, and onboarding efficiency across distributed product teams.

vConstruct, Pune

UX UI Design Intern

Nov 2021 - June 2022

- Delivered 6 end-to-end enterprise product initiatives from ideation to MVP by owning UX strategy, interaction design, and stakeholder alignment; enabled faster decision-making across construction and operations teams.
- Enhanced operational efficiency by designing complex dashboards, workflows, and reporting systems that translated high-volume project data into actionable insights for planners and project managers.
- Streamlined internal planning, estimation, and project management experiences by leading UX improvements across core tools, reducing friction in day-to-day execution and boosting cross-team coordination.

EDUCATION

O.P.Jindal Global University, Online

Master of Design (M.Des) in User Experience (UX), AI Specialization

2024 - 2026

Symbiosis Institute Of Technology, Pune

Bachelor of Technology (B.Tech) in Information Technology

2018 - 2022

ACHIEVEMENTS

- Recognized as a "Rockstar Performer" twice at miniOrange (2023, 2024) for consistently delivering high-impact UX and product design outcomes across enterprise security platforms, including cross-functional initiatives beyond core product responsibilities.
- Designed a 140+ screen AI-powered B2B mobile platform for heavy equipment aggregation; secured a top-3 finish among 40+ teams and contributed to a 4.9 app rating through UX-led improvements.

SKILLS & TOOLS

Product Design: UX Strategy, Problem Reframing, End-to-End Product Design, Platform UX, Enterprise Workflow Design, Experience-Driven Design, Design Handoffs, Strategic AI/Automation Decision Making, Wireframing

UX Research: User Interviews, Usability Testing, UX Audits & Heuristic Evaluation, Scenario Mapping

Systems & Scale: Systems Thinking, Design Systems & Component Libraries, Accessibility, Multi-Product Consistency, Vision Documentation, Cross-Domain Pattern Recognition

Collaboration: Product Partnership, Research-Backed Stakeholder Management, Cross-functional Leadership, Workshop Facilitation, Storyboarding

Tools: Figma, Figma Make, Miro, Framer, Claude, Gemini, Make.com, Replit
